REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose an occupant protection activation device that comprises a first safety determining means; a second safety determining means for making a safety determination by using at least one of the output signals of the second in-vehicle acceleration sensor and the front-end acceleration sensor, wherein the second safety determining outputs a second safety output signal; a signal processing means including the collision determining means and the second safety determining means, wherein the signal processing means outputs a processed output signal; and an actuating means for actuating an activating means of the occupant protection apparatus by an AND operator of the first safety output signal of the first safety determining means and the processed output signal of the signal processing means, wherein the actuating means outputs a AND operator output signal. These limitations are neither taught nor obvious by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
